<b>Technical Information</b>	EXE File for Windows (download only); Various Annual Licences
<b>Technical Requirements</b>	PC   PC + Projector / Interactive Whiteboard   Headphones / Speaker, Microphone Screen Resolution at least 1024x768 pixels
<b>Additional Materials</b>	KIKUS Picture Cards, KIKUS Mini Picture Card Worksheets, KIKUS German Complete Edition (CD-ROM)
<b>Product Website</b>	<a href="http://www.kikusinteraktiv.org">www.kikusinteraktiv.org</a>

**KIKUS interaktiv** is a Language-Learning Software that helps beginners from 3 to 99 years to learn a language in a playful way. It can be used on any PC and in combination with a projector or an interactive whiteboard. This means that it can be used at home, in the classroom or in any other location.

It is built on the **KIKUS Picture Cards** and the **KIKUS Mini Picture Card Worksheets**, which have been tried and tested many times in practice. They include a basic vocabulary of 240 words (nouns, verbs, prepositions, adjectives, etc.). **KIKUS interaktiv** currently provides this basic vocabulary in 9 different languages. All items can be depicted in their basic form in writing and they can be listened to as well.

In addition, you can integrate your own cards using a Card Editor (picture, written word and sound). In this way you have the opportunity to compile vocabulary on certain topics together with the learners (e.g. technical vocabulary), which is also relevant for vocational schools. Then the learners, the children and possibly their parents are asked to add the new vocabulary in their own languages. In this way, interactive learning takes place at different levels.

**KIKUS interaktiv** includes a Creative Area, in which you can design your own exercises, and a Games Area with prepared games (vocabulary building and grammar). There are four user languages to choose from.

**KIKUS interaktiv** was developed with multilingualism didactics in mind. For example, teachers can combine activities for the second language German with the individual first languages of the learners that they “bring along” to the exercise. This promotes language awareness and empathy among all learners. Using **KIKUS interaktiv**, parents have the opportunity to support the children at home - and to learn along with them.

Example:

The screenshot shows the KIKUS interaktiv software interface. At the top, there are menu tabs: "Kreativbereich", "Spiele", "Karteneditor", "Sprache", and "Einstellungen". The "Karteneditor" tab is active, showing a toolbar with icons for checkmark, delete, undo, redo, and a grid. The top right corner features the "KIKUS interaktiv" logo. On the left, there is a search bar with "baum" entered and a list of image cards. The main workspace contains two rows of cards. The first row has cards for "Edgardis", "tanzen", "unter", and "Baum". Below these cards, the words "Edgardis", "tanzt", "unter", and "dem Baum" are displayed, with "tanzt" and "dem" having small blue underlines. A light blue box contains the sentence "Edgardis tanzt unter dem Baum." The second row has cards for "Edgardis", "bailar", "debajo de", and "árbol". Below these cards, the words "Edgardis", "baila", "debajo", "del", and "árbol" are displayed, with "del" and "árbol" having small blue underlines. A light blue box contains the sentence "Edgardis baila debajo del árbol." On the right side, there is a vertical toolbar with various icons for editing and presentation.
