Product Information

The basis of KIKUS® interaktiv is provided by the tried and tested KIKUS® Picture Cards and the KIKUS® Mini Picture Card Worksheets. They include a **basic vocabulary of 240 words** (nouns, verbs, prepositions, adjectives, etc.). KIKUS® interaktiv currently contains this basic vocabulary in 9 different languages. All items can be depicted in their basic form in writing and they can be listened to as well.

In addition, you can create your own picture cards using the **Card Editor** and link these with multi-media pictures, text and audio in all learning languages. In this way you can integrate the vocabulary of a certain topic (even technical vocabulary) which might be interesting for professional schools. At the same time, you can actively involve the learners and/or their parents. The best way for interactive teaching and learning.

KIKUS® interaktiv contains a **Creative Area** in which you can design your own exercises, and a **Games Area** in which you can find prepared learning games and exercises (vocabulary and grammar). There are four user languages to choose from: English, German, Polish and Spanish.

KIKUS® interaktiv was developed with multilingualism didactics in mind. For example, as a teacher you can combine activities for the second language German with the individual first languages of the children that they "bring along" to the exercise. Or you can put together a specific vocabulary set with the learners in several languages. This promotes language awareness and empathy among all learners.

Choose your cards in the Preparation Area

Create your own cards with the Card Editor

Show article dot

Listen to the word in 9 languages

You can change any card from the colour version to the black&white version

Show the words in their basic form in writing

Show the cards in other languages

Write the correct sentence with the text editor

Mark the changes in the sentence with the drawing function

In addition to KIKUS® interaktiv your learners can use the **KIKUS App – free of charge – all over the world!**

It contains all games in 11 languages and can be used on any smartphone or tablet.
